

KOMAL MAHAJAN

MIS Analyst | Excel | Advance Excel | SQL | Power BI | Python

Pune, Maharashtra | komal.career16@gmail.com | +91 8007800255 | LinkedIn | Portfolio | GitHub

PROFESSIONAL SUMMARY

I'm MIS Analyst with 2.6 years of professional experience in data analytics, MIS reporting, and dashboard development. Skilled in collecting, cleaning, and transforming raw business data into clear insights.

Proficient in Excel, Advanced Excel, SQL Server, Advance SQL, Power BI, and Talend Studio for creating Data sync jobs and managing data integration (ETL).

Experienced in CRM data management, customer behaviour analysis, and presenting findings to stakeholders. Adept at using AI productivity tools to streamline workflows and improve operational efficiency.

TECHNICAL SKILLS

Databases & SQL: Microsoft SQL Server, SQL Queries, JOINS, Aggregations, CTEs, Subqueries, Data Extraction, Data Cleaning.

Microsoft Excel: Excel, Advanced Excel, Pivot Tables/Charts, VLOOKUP, XLOOKUP, Conditional Formatting, Dashboards, Report Preparation.

Reporting & Power BI: Power BI, Dashboard Reporting, KPI Tracking, Interactive Charts, Data Visualisation.

ETL & Data Handling: Talend Studio 8, Job Creation, Data Transformation, Data Analysis, MIS/Business Reporting, Data Management.

CRM Tools: Customer Data Management, Feedback Analysis, Product Records, Customer Engagement Tracking.

Programming & AI Tools: Python (OOPs Basics), Microsoft Copilot, Google Gemini, ChatGPT, Claude AI.

PROFESSIONAL EXPERIENCE

MIS Executive | [Herbal Deck – Retail Health & Personal Care, Indore, MP](#)

18 Mar 2023 – 30 Sep 2024

- **Managed CRM & Database Operations:** Handled end-to-end CRM data management, cleaning and maintaining customer records for 20+ product SKUs to ensure database accuracy.
- **Built Advanced Excel Dashboards:** Developed dynamic Excel dashboards using Pivot Tables, VLOOKUP/XLOOKUP, and conditional formatting to track daily, weekly, and monthly business metrics.
- **Generated MIS Reports:** Created and presented structured MIS reports and visual data summaries for management, turning raw data into clear business updates.
- **Analysed Trends & Inventory:** Tracked product performance, demand trends, and customer feedback to identify top-performing categories and support marketing strategies.
- **Collaborated on Team KPIs:** Worked directly with business stakeholders to gather reporting requirements and deliver customized Excel reports aligned with company KPIs.

MIS Analyst | [Code Precise IT Solution LLP, Indore](#)

07 May 2025 – 30 April 2026

Project: Education Domain – Maestro. Study

- **Generated MIS Reports:** Prepared daily, monthly, and yearly business reports using Excel and SQL Server, ensuring accurate and on-time delivery to stakeholders.
- **Optimised Data Extraction:** Executed SQL queries, JOINS, and data filters to extract and maintain platform records, significantly reducing manual data retrieval time.
- **Built Excel Dashboards:** Developed performance tracking reports using Pivot Tables, VLOOKUP, formulas, and charts to monitor business KPIs.
- **Supported Power BI Visuals:** Assisted in creating interactive Power BI dashboards to help management monitor key metrics and make data-driven decisions.
- **Ensured Data Quality:** Performed regular data validation, data cleaning, and database maintenance to uphold high accuracy standards across all client deliverables.

PROJECTS

ETL – Data Integration using Talend Open Studio 8

May 2026

Tools: Talend Studio 8, Excel

- Architected an end-to-end ETL job creation in Talend Studio 8 to extract data from Excel files or any other databases and process data and transform it, and load into target systems like database's.
- Configured Palettes components to ingest and parse structured source data, and implemented components for fetch data and transformation logic between source and target datasets.
- I Applied data validation and transformation rules within the ETL workflow to maintain data integrity throughout the talend job.

HR Analytics | [HR Analytics Dashboard – Employee Attrition Analysis](#)

Feb 2025

Tools: SQL, Power BI, Microsoft Excel, DAX, KPI Tracking.

- Developed an interactive HR Analytics dashboard in Power BI and Excel to analyze employee attrition across 4+ dimensions: department, salary band, gender, and experience level.
- Created dynamic KPI cards and visual reports for attrition rate, headcount, and salary benchmarks enabling HR leadership to identify at-risk segments.
- Applied DAX functions and advanced filtering to build calculated measures for attrition rate trends and demographic breakdowns.

Retail / Sales Analytics | [Superstore Sales Analysis](#)

Jan 2025

Tools: Microsoft Excel, Power BI, Data Cleaning, Data Visualisation.

- **Created Interactive Dashboards:** Analyzed a retail sales dataset using Excel and Power BI to build dashboards tracking sales trends, product performance, and regional breakdowns.
- **Optimised Data Quality:** Performed data cleaning and validation pipelines prior to the dashboard build, improving data reliability for final business reports.
- **Identified Sales Trends:** Spotted top-performing products and seasonal sales trends through visual reporting to provide actionable insights for inventory and marketing decisions.
